Projects

Advanced CRUD App: | Using MERN Stack Food Delivery Web Application (MERN Stack) | [LIVE](#)

Designed and developed a full-featured E-com platform using the MERN stack (**MongoDB, Express.js, React.js, Node.js**). Implemented user authentication, course creation and enrollment, Integrated secure **JWT-based login, RESTful APIs, and responsive UI/UX design**. Ensured real-time updates and optimized performance across devices

Experience

MERN FULL-STACK INTURNSHIP [Euphoria GenX]

2025 (SIX MONTHES)

- Built advanced CRUD operations using MERN stack with robust backend validation.
- Ensured type-safe APIs via schema-based data validation and parsing.
- Used Express middleware for request validation across all operations.
- Created reusable validation schemas for better scalability and fewer bugs.
- Implemented custom error handling for clean API responses and improved UX.
